Job Title: Research Assistant
Department: Center for m2Health
Reports to: C. Barr Taylor, M.D.
Hours: Approximately 10 hours/week
Rate: \$20.00/hour
Apply: Please send an email cover and resume to: btaylor@stanford.edu

JOB DESCRIPTION

The Research Assistant (RA) will perform a number of tasks related to an NIMH grant, Harnessing Mobile Technology to Reduce Mental Health Disorders in College Populations. The purpose of this grant is to determine the effectiveness of a mobile platform that provides standardized cognitive behavioral interventions to reduce symptoms of anxiety, depression and eating disorders. The RA will help with the intervention deployment, including recruiting and training coaches, and will help provide coaching. The RA will also help oversee other tasks related to the grant, including organizing meetings, helping with human subjects and interfacing with other sites.

Duties and Responsibilities:

- Helps with coach training, supports coaching supervision
- Helps to recruit coaches
- Provides coaching (amount to be determined)
- Meets with team on a regular basis and attends relevant cross-site meetings
- Helps with IRB updates and related issues
- Helps with other, unspecified management tasks, such as arranging cross-siting meetings and material

Qualifications

- BA or equivalent, post graduate mental health training
- Excellent interpersonal skills and ability to work in multidisciplinary environment
- Detail oriented with the ability to work independently, and accurately
- Strong clinical skills
- Knowledge of Microsoft office, Google products, Adobe Acrobat, Zoom, Qualtrics, Excel etc.
